FINANCIAL AND COMMERCIA!

New York, March 25.—Price tendencies in the stock market today were unmistakable upward, although profit-taking occurred in the final hour on the gradual rise of call loans from 4 1-4 to 5 per cent. advance was attended by a pro-

nounced increase and breadth of opera-tions to which the short interest made voluntary but substantial contribution. In contrast to recent dealings, today's transactions comprehended a majority high class or dividend-paying rails and industrials, Better industrial prospects again wer

batter industrial prospects again were the chief accelerating force. Still high-tr prices were quoted for finished fron and steel, and latest surveys of condi-tions by trade authorities, including the from Age, were almost optimistic. Even coppers were not unfavorably influ-enced by further weakening of prices in the metal market.

very considerable portion of the business apparently emanated lar's business apparently emanated from professional sources, but no small bart of he inquiry for seasoned shares and bonds was credited to investors seeking an outlet for April interest and stridend incomes. Steels, equipments, slis, motors and utilities were the stocks most in demand. Coalers furnished much of the buying power among the rails, torether with junior issues, especially To edo. St. Louis and Western common preferred, Sales amounted to 785.00-

Withdrawals for federal account ocwithdrawais for federal account oc-maioned the firmer tone of demand among rates, but time funds were unal-lered. Many 20 to 90 day offerings were made on the 4 1-2 per cent, basis and several longer maturities for commercial paper were accepted at the same rate. Deadlags in foreign exchanges were unusually dull and fregular. Sterling showed a further slight recovery from the recent reaction. The Paris rate sased nominally and most other contitental bills were 3 to almost 10 points algher. Reports that the Spanish govstrament is seeking a large loan in this narket were not reflected in the movement of the pessen.
